## Celebrating Black Heritage within Dentistry

DR. CLARENCE  
HOLMES

### Dental Practice

Dr. Clarence Holmes

Clarence Fitzhugh Holmes was born May 21, 1892 in Denver, Colorado, after his parents moved from Washington D.C. Clarence and his older brother William grew up at 2139 Curtis Street. He attended Ebert School and graduated from Manual High School in Denver in 1913, and Howard University and Howard University College of Dentistry in Washington D.C. (B.S. 1917, D.D.S. 1920). Clarence Holmes married Fairfax Butler Richey on April 2, 1923 in Denver. They moved briefly to Pueblo, Colorado in 1926, but returned to Denver in 1931.

### “Worth Noting!”

At City Endodontics we strive to give the best patient care and welcome everyone into our office.

Here are some ways to advocate good patient care:

#### Be Prepared:

Review all patients dental and medical history.

#### Always try to greet patients warmly:

COVID-19 has made it difficult to show a friendly smile so call each patient by their name as soon as they walk into the practice and don't forget about your body language, always try to make eye contact when speaking with patients.

#### Make each patient feel at home

Offer patients electronic reading material and bottled water.

#### Reassure them that they are in good hands:

Let them know that the dentist and dental team will address all of their questions & concerns.

#### Have a blessed season!

## The Power of Research in a time of COVID

In this Endo Voices episode, we strategically unpack the significance of research and how to read an article. Keeping up to date with research and best practices took on a new precedence as virtual learning re-positioned itself against the backdrop of the COVID-19 pandemic!

We welcome researching clinical endodontists, Dr. Anita Aminoshariae, past member of the ADA Council on Scientific Affairs, and Dr. Rob Roda, associate editor for the JOE, to the podcast as they share insights from their unique perspectives. Ever wonder how to properly assess research articles, how to interpret the value of a publication's impact factor, or what questions to ask to identify where the gap in research exists?

Our discussion touches on various techniques to extract the pertinent information from an article for quick and thorough analysis, and how to evaluate research methods and study designs. Our guests decipher when a clinician should implement research into their daily practice with the goal of patient-centered outcomes at the core.

## Save the Dates!!

### PROJECTS/PRESENTATIONS

#### Podcast with Dr. Keith Krell & Dr. Eric Rivera CRACKED TEETH

American Association of Endodontists - Hosted by Dr. Johnson

Date: 2/16/2021

Time: 07:00 PM

Meeting ID: 862 3638 3982

Pass code: 388095

## Reliable, Reproducible, Results!

Tooth#14

Patient was swollen and in pain. OS took out #13 due to root fracture and then #14 was drained and medicated and retreated. An additional MB2 canal was located. All 4 canals were cleaned and shaped. Patient is asymptomatic!
